Theme-specific aims and objectives

- identification of factors relevant to quality enhancement in language studies;
- description and analysis, for the participating countries, of quality enhancement measures applied at national, regional, institutional, and departmental level to the extent that these are relevant to language studies;
- identification of examples of good practice;
- development of proposals for quality enhancement in language studies (expected to be relevant to the work undertaken under the other two themes);
- production of a report presenting a number of scenarios for quality enhancement in language studies and of a dynamic Website;
- preparation of project proposals dedicated to quality enhancement in language studies;
- initiation of a European project in this area.
